8. Comments about the strengths or weaknesses of the presentation.

- Excellent session!
- Excellent tips!
- Great job on the audio descriptions. The tips were fantastic and usable. We would love to make this available to the larger community if you're amenable. Someone from QM will be in touch. Please refer to standards as Met or Not Yet Met. No one can "fail" a QM review because it's all about continuous improvement! Fantastic session!
- I think my favorite part of the presentation was Mr. Tobin's descriptions of the images he used in his slides. I will incorporate this practice into my future presentations to give the audience/participants an example of how to use images to illustrate points in the content, but also how to describe them so they are accessible to all. Well done!
- Loved the Bonus secret at the end!
- Thank you!
- Thanks, Thomas! This was well put together, engaging, and helped better apply the Specific Review Standards in General Standard 8 with hands-on opportunities, and it was at the analysis level, which can be challenging in a webinar. KUDOS!
- The presenter was very prepared and brought great reminders in regards to accessibility. Some technical difficulties with document sharing made participation challenging, but the presenter adjusted accordingly and made it work out.
- This was a good presentation with an articulate and skilled presenter. I feel that it helped me be a better QM assessor by giving me additional information about checking for accessibility, by prodding me to think about how I present information, and by reminding me that I have colleagues who are out there ready to help and discuss issues in QM.
- Thomas is an excellent presenter. I especially love how he described the images used in each slide out loud.
- Time well organized, excellent information.
- Very good session. Interactive. Focused. Creative. Substantive take-aways! Well done!
