Tom,

Thank you so much for such an engaging and thought-provoking series of sessions today! I really appreciated your leadership in guiding conversations for our faculty, instructors, and staff. I think folks took away actionable items for supporting students both this semester and in future semesters. I am looking forward to continuing to build on this strong foundation as an institution.

Thank you again for all your efforts supporting us as we continue to engage more deeply with UDL principles, actions, and ideas.

Best,  
Amy
